

# Dustin Zeisler

---

## Senior Ruby/JavaScript Developer

[Blog](#) | [Portfolio](#) | [Github](#) | [Twitter](#) | [LinkedIn](#) | [Email](#)

(503) 410-3119

## Skill Summary

---

Ruby, JavaScript, Ruby on Rails, RSpec, Reactjs, Flux, Angularjs, CoffeeScript, SQL, PostgreSQL, Jest, Jasmine, Karma, HTML5, CSS3, Sass, Kendo, Rake, Thor, Bundler, Amazon Web Services, Unix, Git, Github, Mercurial, Vagrant, Continuous Integration, TeamCity, LeanKit, JIRA, Agile, TDD, BDD, Isolated Unit Testing, Design Patterns, MVC, Object Oriented Design, Pair Programming

## Open Source Creations

---

- [Active Mocker](#): A tool to increase productivity in Ruby On Rails when testing code that has database interactions.
- [Dissociated Introspection](#): Introspect methods, parameters, class macros, and constants without loading a parent class or any other dependencies.

## Experience

---

### Software Developer - Cambia/SpendWell Health 6/2015 - 9/2015

- Trained team on Test Driven Development by giving presentations and one-on-one training.
- Led development and architected a multi step guided search app for health care, using Reactjs.
- Implemented React Router to make a fully bookmarkable client side app.
- Used the flux pattern to create unidirectional data flow between components.
- Increased team productivity by creating understandable and tested code.

### Software Developer - Fiduciary Benchmarks 9/2013 - 2015

- Built and architected rails project from the ground up.
- Collaborated with business to create benchmarking algorithms for 401k and other Investments.
- Provided the business with dynamic documentation on how benchmarking results were derived.
- Paired with co-workers on features while practicing test-driven-development.
- Developed patterns for fast tests by isolated core logic from Rails and database access.
- Wrote command line interface developer tools.
- Created image diffing tool to detect unexpected changes to high value PDF reports.
- Optimized slow Ruby code by analyzing object allocation, performance, and memory usage.
- Highly optimized JSON API using Ruby on Rails and PostgreSQL with large data sets.

### Resident - Portland Code School 6/2013 - 8/2013

- Mentored Students through pair programming.
- Core contributor for [movie recommendation site](#) using movie-rating API.
- Created [Scrabble game](#) for web that validates words and tracks score.

## Web Developer - NorthTechDefense.com *9/2012 - 5/2013*

- Collaborated with client to design e-commerce application including database, security, and UI.
- Geocoded 60,000 rows of addresses for use with Google Maps API.
- Implemented security for user account login involving hashed and salted passwords.

## Community Activities

---

- Lead Weekly Ruby Book Club - *2015 - Current*
- Attend Monthly PDX Ruby meeting
- Cultural Guide For Non-Profit in Mexico - *4/2008 - 8/2008*
  - Leading and training volunteers in cultural etiquette and housing construction in rural Mexico.

## Education

---

- Learning every day!
- Podcasts/Videos: [Ruby Rogues](#), [Ruby Tapas](#), [Security Now](#), [Bike Shed](#), [Debug](#)
- Avid watcher of conference talks. Favorite presenters: [Sandi Metz](#), [Uncle Bob](#)
- Portland Code School, Instructor Chuck Lauer Vose, Burnside Digital *6/2013 - 8/2013*
- Software Engineering, Mt Hood/Portland Community College *2011 - 2013*
- Phi Theta Kappa, Honor Society
- Spanish Immersion Program, Antigua, Guatemala *6 months, 2008*
